# EJERCICIO NRO. 001

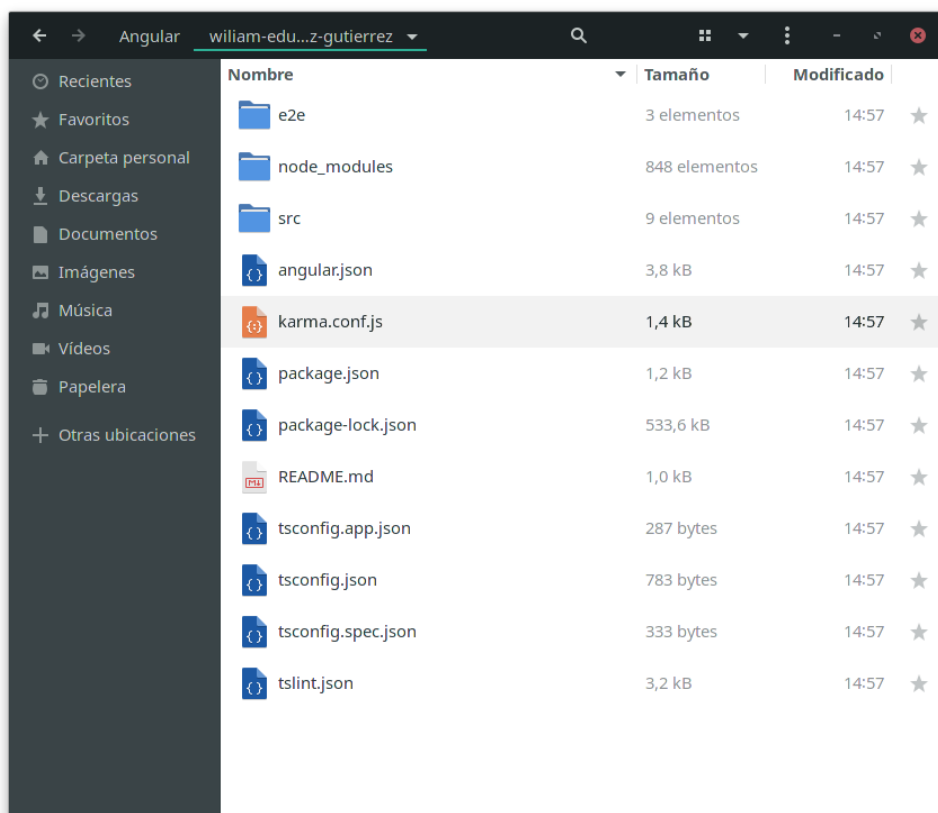

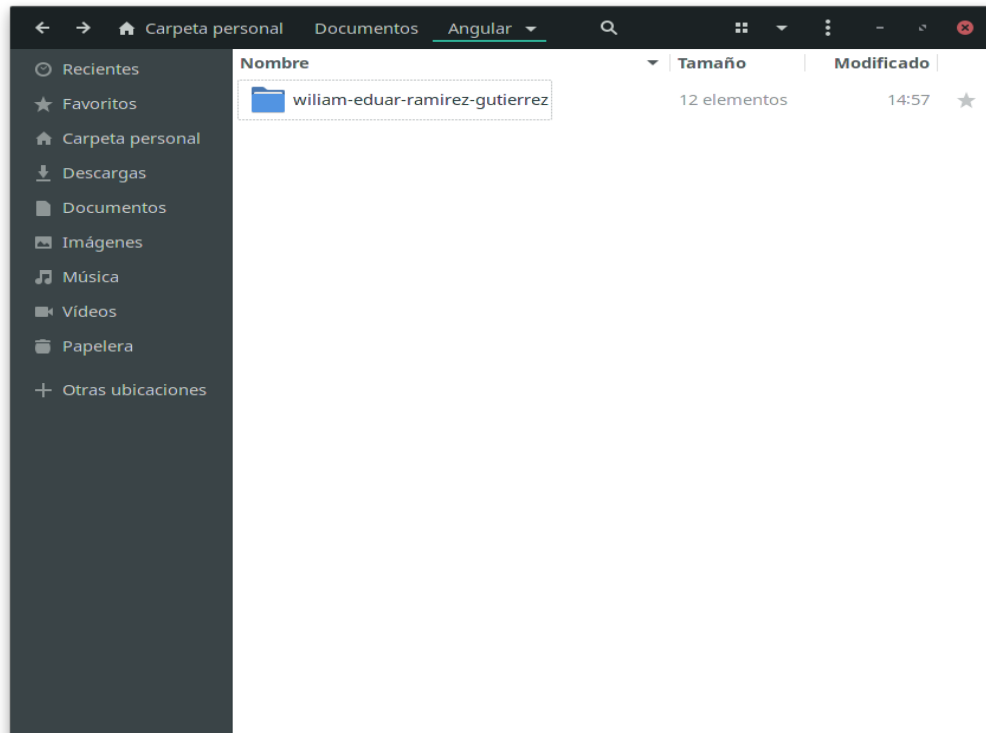

## 1. Creación del proyecto

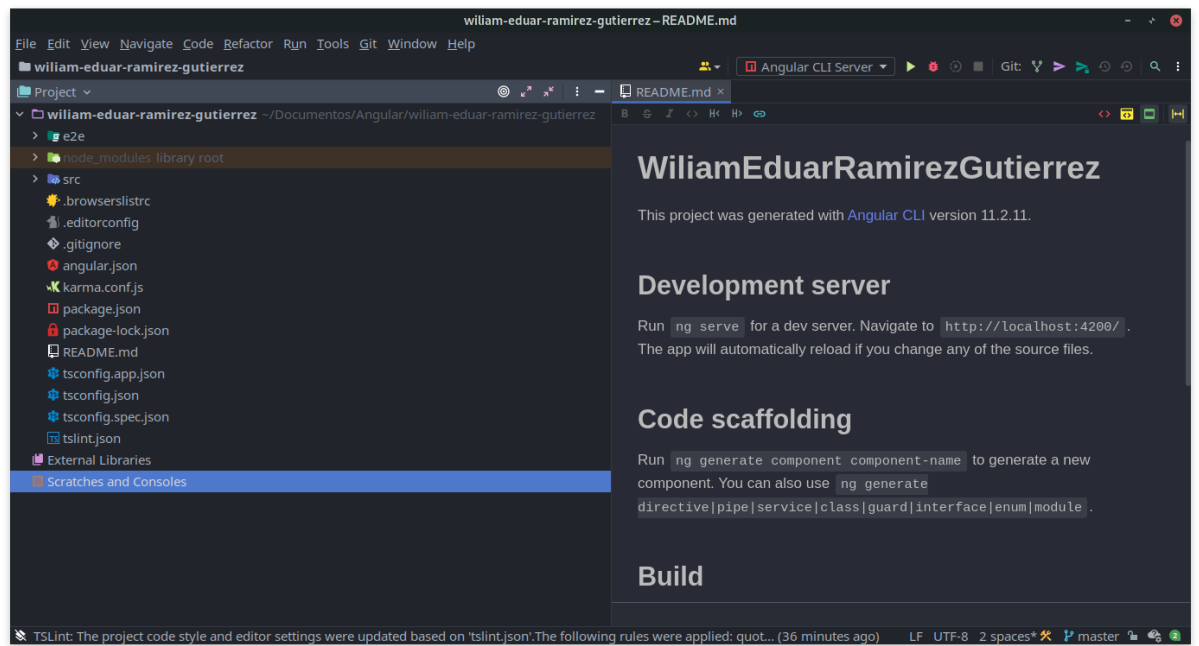

A terminal window titled "ng new wiliam-eduar-ramirez-gutierrez" showing the command "ng new wiliam-eduar-ramirez-gutierrez" being executed. The terminal displays a series of prompts and user responses for creating a new Angular project. The prompts include questions about enforcing stricter type checking, adding Angular routing, and selecting a stylesheet format. The user responds "Yes" to the first question, "No" to the second, and "CSS" for the third. The terminal also lists the URLs for the selected stylesheet formats: SCSS, Sass, Less, and Stylus.

```
ng new wiliam-eduar-ramirez-gutierrez
~/angular ng new wiliam-eduar-ramirez-gutierrez
? Do you want to enforce stricter type checking and stricter bundle budgets in the workspace?
  This setting helps improve maintainability and catch bugs ahead of time.
  For more information, see https://angular.io/strict Yes
? Would you like to add Angular routing? No
? Which stylesheet format would you like to use? (Use arrow keys)
> CSS
SCSS [ https://sass-lang.com/documentation/syntax#scss ]
Sass [ https://sass-lang.com/documentation/syntax#the-indented-syntax ]
Less [ http://lesscss.org ]
Stylus [ https://stylus-lang.com ]
```

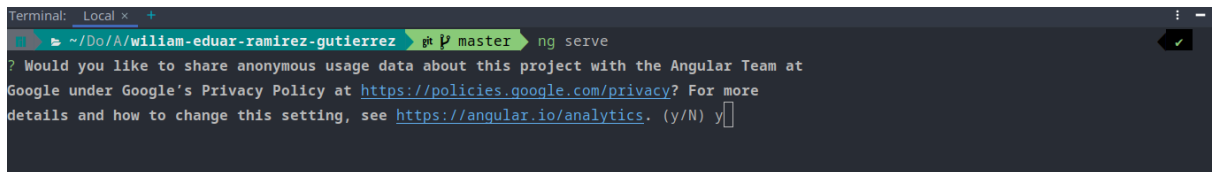

## 2. Estructura del proyecto

### 3. Previsualización en el editor de texto

### 4. Ejecutando proyecto

### 5. Proyecto ejecutándose en localhost:4200
